

CURA® 4040 ICU & CCU Bed

Features and benefits

The **lowering of the split siderails** can be activated using **one hand** and feature a smooth, rapid self-lowering mechanism allowing for quick access to patients

Stable support is provided during bed exit via an **Ergonomically placed side egress grip handle**

Intuitive bed controls require minimal in-service staff training and help minimise the risk of user's error

One Touch Side Egress positions the bed for safer and easier bed exit

AutoContour and **SlideGuard** minimise patient migration in bed, reducing abdominal compression during bed articulation

EasyChair and **flat position function** offers patients the ability to quickly reach a comfortable seated position

Low height indicator warns the caregiver if the bed is not in the lowest position, contributing to a safer patient environment

5th castor facilitates easier bed transport in any direction

One Touch Shock positioning flattens the upper deck and places the bed into a Trendelenburg position, should patient complications occur

Intelligent night light enhances operational safety for both patients and caregivers

Alerts caregivers of potential break release available with controlling the pedals.
