

# FOR LIFE IN THE CENTER OF THE ACTION

## Interton - Essential Hearing

Founded in Germany in 1962, Interton today is part of one of the world's largest hearing instrument organizations, the GN Group. We use their proven core technology in a way that falls in line with our own way of doing things. We believe that most people need a straight-forward, functional and easy-to-use hearing solution at a fair price. So that's what we give them.

### New - Control your Interton Centro from iPhone®, iPad® or iPod touch®

Made for iPhone functionality is an exciting new feature that you will not find in standard hearing aids. It allows you to stream audio from your iPhone directly to your hearing aid. This means you can access everything from music to FaceTime calls and GPS instructions, and adjust volume and programs directly from your iPhone, without a streamer around your neck. If you are an Android user you will be able to enjoy the same great functionalities, like adjusting volume and changing programs when using the Interton Phone Clip 2 and the EasyHearing app.

With all the intelligent features, Interton Centro will give you the confidence to live a carefree life - right in the centre of the action!

## Intelligent and comfortable hearing

Interton Centro has a flexible, adaptable design to ensure your comfort and convenience. That way you can easily get started with Interton Centro and make it a natural part of your life.

**Acclimatization Manager** is an intelligent feature that makes your transition to Interton Centro as comfortable as possible. It gives your ears a chance to get used to Centro's settings step-by-step.

**Ear-to-Ear Communication** automatically synchronizes volume or programs between your left and your right ears, elegantly keeping them in balance. The volume setting can be quickly and discreetly adjusted if sound environments change - just adjust one side, and the other follows automatically. Easy and discreet.

**Comfort Phone** helps you focus your listening attention when you receive a phone call. When you bring a phone up to one ear, it automatically reduces the volume in your other ear. Background noise is reduced yet still audible, so you are still aware of what's going on around you. That's intelligent hearing.

# Clear sound and great speech understanding, anywhere!

Being an active person, you find yourself in a variety of different listening environments; moving from the quiet of nature to the bustle of a city; from indoors to outdoors; from being alone to meeting others. Interton Centro eases these transitions, making sure you can distinguish the sounds around you anywhere.

## **Focus on speech**

Interton Centro's advanced directionality options facilitate comprehension in noisy environments and help you focus on speech.

## **Adjusting to the situation**

Your Interton Centro hearing aids are designed to adjust gain settings automatically for better listening experiences in five distinct acoustic environments. When they recognize one of these environments, your devices automatically apply the necessary gain and noise reduction.

## **Hugging without the feedback**

Feedback Manager Plus removes feedback and whistling when you hug a loved one or hold a phone close to your ear.

## **And for music lovers**

With Music Mode, you'll be sure to get great sound quality whenever you're listening to music.

## Small and discreet - yet built to last

Interton Centro offers excellent form and function. These small, ergonomically designed hearing aids sit comfortably behind your ears and are barely visible. On top of that they are made to handle your specific hearing loss and individual needs.

Interton Centro hearing aids are built to last. The whole hearing aid is covered with our unique Nano Coating treatment, which keeps them safe from moisture, sweat and dust. No need to worry - just continue your active life.

With Interton Centro you can choose from seven different colors to match your hair, skin color and personal style.

# Watch TV with the sound directly in your ears

Interton Centro incorporates 2.4 GHz wireless technology, that allows your hearing aids to connect directly to your phone, TV, computer or stereo system without bothersome connectors! Now that's wireless freedom!

**Interton TV Streamer 2** streams clear stereo sound from the TV, stereo or computer wirelessly to your hearing aids without connectors around the neck.

**Interton Remote Control 2** with convenient LCD display, lets you control volume, program settings and streaming devices - such as the TV Streamer 2 and Mini Microphone.

**Interton Mini Microphone** streams speech directly to your hearing aids. Clip the microphone to a family member or friend and stream their speech directly to your ears!

**Interton Phone Clip 2** lets you stream conversations and music directly to your hearing aids from a Bluetooth® mobile phone. It doubles as a remote control so you can discreetly adjust volume and programs.

## **Interton EasyHearing app**

### **- free downloadable connectivity**

Compatible with both iPhones and Android phones, Interton EasyHearing is a great downloadable app for Interton Phone Clip 2 that lets you control hearing aid volume and programs discreetly. It's as easy as sending a text message - and to the rest of the world, it looks as if you're doing just that.
